Status	Final - machine generated
Prepared by	Cybercrime Investigation Intelligence System, automated analysis pipeline
Handling	Restricted - Law Enforcement Sensitive

Basis of this report. Every statement is templated over a stored forensic finding; the generator has no free-text capability and cannot introduce a fact the analysis did not compute. Where an input was unavailable the report says so explicitly rather than inferring. Section 18, Report Provenance & Integrity, lists the SHA-256 digest of every source artifact, so this document can be tied back to the exact evidence state it was produced from.

Distribution. This report contains material relating to an active investigation. Onward disclosure is restricted to persons authorised by the case officer.

1. Executive Summary

- Case CASE_185915593C contains 8 evidence items, each acquired under SHA-256 chain-of-custody verification.
- This case is linked to 2 other cases through shared entities: CASE_1A1BF573F3, CASE_EE8250FB76 [cross_case_correlation.json].
- The weighted correlation engine found 28 related evidence pairs out of 28 analysed [correlation_analysis.json].
- 1 coordinated campaign were identified; the largest (CAMP_CASE_185915593C_01) groups 5 items [campaign_analysis.json].
- The strongest suspect anchor is '+9779801122334' (khalti_ids) with confidence 78/100 [suspect_assessment.json].
- Observed attack progression: initial_contact -> financial_transaction -> social_engineering -> post_attack [timeline_analysis.json].

2. Scope & Methodology

- **objective:** Acquire, verify, correlate and reconstruct the digital evidence for this case, and derive investigative leads (suspect anchors, campaigns, cross-case links) strictly from stored, hash-verified artifacts.
- **evidence scope:** 8 evidence items acquired through the CIIS intake pipeline under SHA-256 chain-of-custody control.
- **methodology:**
 - Phase 1 - Acquisition & OCR: PaddleOCR PP-OCRv5 text extraction with per-item confidence scoring; SHA-256 fingerprint recorded at intake and re-verified at read.
 - Phase 1 - Forensics: metadata/EXIF consistency, forgery signals, logo detection and evidence-confidence scoring stored per item under storage/forensics/.
 - Phase 2 - Correlation: weighted entity-overlap engine scoring every evidence pair; results in correlation_analysis.json.
 - Phase 2 - Cross-case: shared-entity matching against every other analysed case (cross_case_correlation.json).
 - Phase 2 - Campaigns / Suspects / Timeline: clustering, anchor derivation and event reconstruction over the correlated evidence set.
 - Threat intelligence: URL/domain indicators scored by the configured provider (static indicator file, or the trained phishing classifier when CIIS_ML_THREAT_INTEL=1); per-indicator results in 'Model Prediction Results'.
 - Reporting: this document is assembled exclusively from the stored outputs above; it contains no free-text generation.
- **reproducibility:** Re-running the analysis against the same stored evidence reproduces every figure herein; artifacts are versioned and never overwritten.

Provisions of the Act not listed here were not assessed.

18. Recommendations

- Get the fake websites shut down: esewa-cashback-offer.xyz, esewa-verify-kyc.com (+1 more). Ask the hosting company to save its records first.
- Tell eSewa their name is being used in this scam, so they can warn other customers.
- Ask eSewa who owns these wallets (KYC) and their payment history: sunita.gurung21@gmail.com, esewa.cashback99@gmail.com.
- Ask Khalti who owns these wallets (KYC) and their payment history: +9779801122334, +9779847011223.
- Ask the bank who owns these accounts and their statements: 05010198765432, 9847011223 (+1 more).
- Include these payment reference numbers in those requests so the transfers are easy to find: DSN2026, 0119.0625.987456, KH-2026-0611-77245.
- Ask the phone/wallet company who is registered to +9779801122334, +9779847011223 - it appears again and again across this evidence.
- Treat 5 of the items as one scam operation rather than 5 separate incidents - they share the same website.
- Go through the 7 key moments - when money moved and codes were shared - with the victim, and record what they lost.
- Act on this case first (rated 76 out of 100).

21. Statement of Limitations

- This report is produced by automated analysis of the material submitted to the case. It does not constitute an opinion on guilt, and no conclusion here should be read as attributing an offence to a named person.
- Correlation confidence expresses how strongly two items of evidence share identifying features. It is a measure of association, not of causation, and not of identity.
- Suspect scores rank identity anchors observed in the evidence by how strongly the material connects them to the case. An anchor is not a suspect in law until corroborated by investigation.
- Timestamps resolved from the content of an exhibit carry the reliability of that content. Where no timestamp could be recovered, the acquisition time is used and is labelled as such.
- The analysis reflects the evidence held at the date of issue. Material submitted later may change any finding in this report.
